IntellectVoice: Transformative PDF to Audiobook Converter

NAME	ROLL NUMBER	BRANCH	SECTION
Chanda Srija	21951A66G0	CSE(AI & ML)	B

Abstract:

In the digital age, engaging with textual content has transformed significantly, driven by the need for enhanced accessibility, efficiency, and convenience. IntellectVoice is a groundbreaking tool that revolutionizes user interaction with written material, leveraging advanced technologies like Natural Language Processing (NLP), Artificial Intelligence (AI), and Generative AI (GenAI). This innovative solution converts PDF documents into high-quality audiobooks, enhancing readability, comprehension, and overall quality. IntellectVoice's backbone is NLP, facilitating tasks such as tokenization, stemming, and part-of-speech tagging for accurate text handling and analysis. Coupled with AI, known for generating human-like text, and GenAI, which adds context-aware text generation, IntellectVoice ensures engaging and intuitive content. Its summarization process helps users quickly grasp main points, while the paraphrasing feature presents content clearly. Advanced text-to-speech (TTS) engines convert processed text into natural-sounding speech. Additionally, IntellectVoice's keyword extraction identifies key concepts, focusing users on crucial information. Detailed text explanations for complex passages aid comprehension, especially for technical or academic content. Catering to diverse users, IntellectVoice's user-friendly interface allows seamless PDF uploads, setting selection, and audiobook generation. By integrating advanced text analysis and natural language processing, IntellectVoice produces accurate, engaging, and informative audiobooks. The comprehensive feature set is designed to cater to a diverse range of users, from busy professionals and researchers to students and casual readers. In conclusion, IntellectVoice represents a pioneering solution in advanced text analysis and audiobook conversion, combining AI, NLP, GenAI, and sophisticated text processing tools for efficient information consumption. This project enhances textual content accessibility and revolutionizes user interaction with information, showcasing technology's potential to enrich our lives through summarization, paraphrasing, keyword extraction and audiobook conversion. IntellectVoice is a trailblazing advancement in the field of digital content consumption, ensuring that the audiobooks produced are accurate, engaging, and informative.

Technology and Frameworks used: Natural Language Processing (NLP), Artificial Intelligence (AI), Generative AI (GenAI), Text-to-Speech (TTS) engines.

Keywords: Summarization, Paraphrasing, Keyword Extraction, PDF to Audiobook Conversion.
